

HUNGRY FOR CHANGE: VOTE TO END HUNGER

breadfortheworld
HAVE FAITH. END HUNGER.

“Do not withhold good from those to whom it is due, when it is in your power to do it.”

– Proverbs 3:27

Hunger and Poverty Data	Behind the Numbers
Arizona is the 13th hungriest state . Last year, 15.6 percent of Arizona households were at risk of hunger.	The economy is improving, but not fast enough. Relief isn't getting to families that need it most.
Arizona has the 9th highest poverty rate in the country. Over 18 percent of Arizonans lived in poverty in 2013.	Poverty continues to keep families from knowing where their next meal will come from.
More than 1 in 4 Arizona children were living in poverty, including 121,791 children under age 5.	Hunger and poverty hit children hardest. Hunger affects children's growth and education for the rest of their lives.
Since 2009, wages for the bottom 60 percent of American workers have fallen by 4 to 6 percent . Families on average are still earning \$4,500 less than before the recession.	A full-time job is no longer enough to keep a family out of poverty. Congress has yet to pass legislation that increases the minimum wage.
49.1 percent of Arizona households in the Supplemental Nutrition Assistance Program (SNAP, formerly food stamps) are working households. Over half of Arizona SNAP recipients are children or elderly.	Many SNAP participants who can work have a job but still need assistance. Yet some Members of Congress voted to kick 2 million people off the program, many of whom were children, elderly or disabled.
SNAP moved 3.7 million Americans out of poverty in 2013. The average SNAP recipient transitions off the program within 9 months.	SNAP is one of the most effective anti-poverty programs. Yet this Congress has proposed cutting SNAP funding 13 times.
