

## Debunking the Voter Fraud Myth

Sensationalist claims have circulated this election season about the extent of voter fraud, with some politicians [going so far](#) as to [tell voters](#) to fear that this November's election will be "[rigged](#)." Because electoral integrity is one of the elements necessary to making America the greatest democracy in the world, claims like this garner media attention, and frighten and concern voters. But putting rhetoric aside to look at the facts makes clear that fraud by voters at the polls is vanishingly rare, and does not happen on a scale even close to that necessary to "rig" an election.

### Studies Agree: Impersonation Fraud by Voters Very Rarely Happens

- The Brennan Center's seminal report on this issue, [The Truth About Voter Fraud](#), found that most reported incidents of voter fraud are actually traceable to other sources, such as clerical errors or bad data matching practices. The report reviewed elections that had been meticulously studied for voter fraud, and found incident rates between 0.00004 percent and 0.0009 percent. Given this tiny incident rate for voter impersonation fraud, it is more likely, the report noted, that an American "will be struck by lightning than that he will impersonate another voter at the polls."
- A study [published by a Columbia University political scientist](#) tracked incidence rates for voter fraud for two years, and found that the rare fraud that was reported generally could be traced to "false claims by the loser of a close race, mischief and administrative or voter error."
- A [comprehensive 2014 study](#) published in *The Washington Post* found 31 credible instances of impersonation fraud from 2000 to 2014, out of more than 1 billion ballots cast. Even this tiny number is likely inflated, as the study's author counted not just prosecutions or convictions, but any and all credible claims.
- Two studies done at Arizona State University, [one in 2012](#) and [another in 2016](#), found similarly negligible rates of impersonation fraud. The project found 10 cases of voter impersonation fraud nationwide from 2000-2012. The follow-up study, which looked for fraud specifically in states where politicians have argued that fraud is a pernicious problem, found zero successful prosecutions for impersonation fraud in five states from 2012-2016.

### Courts Agree: Fraud by Voters at the Polls is Nearly Non-Existent

- The Fifth Circuit, [in an opinion](#) finding that Texas's strict photo ID law is racially discriminatory, noted that there were "only two convictions for in-person voter impersonation fraud out of 20 million votes cast in the decade" before Texas passed its law.

- In [its opinion](#) striking down North Carolina’s omnibus restrictive election law —which included a voter ID requirement — as purposefully racially discriminatory, the Fourth Circuit noted that the state “failed to identify even a single individual who has ever been charged with committing in-person voter fraud in North Carolina.”
- A [federal trial court in Wisconsin](#) reviewing that state’s strict photo ID law found “that impersonation fraud — the type of fraud that voter ID is designed to prevent — is extremely rare” and “a truly isolated phenomenon that has not posed a significant threat to the integrity of Wisconsin’s elections.”
- Even the Supreme Court, in [its opinion in \*Crawford\*](#) upholding Indiana’s voter ID law, noted that the record in the case “contains no evidence of any [in-person voter impersonation] fraud actually occurring in Indiana at any time in its history.” Two of the jurists who weighed in on that case at the time — Republican-appointed former Supreme Court Justice John Paul Stevens and conservative appellate court Judge Richard Posner — have since announced [they regret their votes](#) in favor of the law, with [Judge Posner](#) noting that strict photo ID laws are “now widely regarded as a means of voter suppression rather than of fraud prevention.”

### Those Who Publicly Argue Voter Fraud is Rampant Have Found Scant Evidence of it When They Go Looking for It

- Kansas Secretary of State Kris Kobach, a longtime proponent of voter suppression efforts, argued before state lawmakers that his office needed special power to prosecute voter fraud, because he knew of 100 such cases in his state. After being granted these powers, [he has brought six such cases](#), of which only four have been successful. The secretary has also testified about his review of 84 million votes cast in 22 states, which yielded 14 instances of fraud referred for prosecution, [which amounts to a 0.00000017 percent fraud rate](#).
- Texas lawmakers purported to pass its strict photo ID law to protect against voter fraud. Yet the chief law enforcement official in the state responsible for such prosecutions knew of [only one conviction and one guilty plea](#) that involved in-person voter fraud in all Texas elections from 2002 through 2014.
- A specialized [United States Department of Justice unit](#) formed with the goal of finding instances of federal election fraud examined the 2002 and 2004 federal elections, and were able to prove that 0.00000013 percent of ballots cast were fraudulent. There was no evidence that any of these incidents involved in-person impersonation fraud.

The verdict is in from every corner that voter fraud is sufficiently rare that it simply could not and does not happen at the rate even approaching that which would be required to “rig” an election. Electoral integrity is key to our democracy, and politicians who genuinely care about protecting our elections should focus not on phantom fraud concerns, but on those abuses that [actually threaten election security](#).

As [historians](#) and [election experts](#) have catalogued, there is a long history in this country of racially suppressive voting measures — including poll taxes and all-white primaries — put in place under the guise of stopping voter fraud that wasn’t actually occurring in the first place. The surest way toward voting that is truly free, fair, and accessible is to know the facts in the face of such rhetoric.
